Sports Physicals

Each student who is participating on any athletic team including cheerleading must have a physical exam each year they participate. A physician, advanced registered nurse practitioner (ARNP), physician's assistant (PA), or chiropractor can do this exam if it is within their scope of practice (as defined in KRS Chapter 312). This has to be on a sports physical form and there is a parent section that has to be filled out and signed by the parent before the child may participate. If your child is receiving a school entry physical it is advised to have a sports physical filled out as well in the event your child does decide to participate in a sport.
