## New Face of the Greyhounds

Nicholas Collier

Last week, Paris City Schools was visited by someone very special. Meet Scarlet, the official mascot of the Paris Greyhounds! Scarlet is 8 years old, certified therapy dog, has won multiple awards at dog shows, has done several Japanese clothing shoots, and now the face of the Greyhounds! We are very excited for Scarlet to join the Paris family!

## Lexington Children's Theatre

Nicholas Collier

On Thursday, October 6th. Paris Elementary hosted the Lexington Children's Theatre. Kindergartners, first graders, and second graders were treated to the daring story of, "Puss in Boots." After lunch, the third graders, fourth graders, and fifth graders sat in on an adventure through paleontology with, "Digging up Dessa." Thank you to Lexington Children's Theatre for coming and allowing our students to experience your amazing performances!

## Homecoming for the Hounds

Cody Martin

This past week was homecoming, so we had alot of events happen. First the football team and the cheerleaders went the elementary school to hold a fun pep-rally to get them hyped for the game against Bracken County. The football game was even better then what people were expecting. We had great start to the game for the first half, they were tied 0-0 but kept fighting and eventually won 14-8 making it a Paris win. At half time of the game they hosted the homecoming court candidates which were all stunning, but there only could be one winner, which was Jamie Cowan. Come Saturday night, it was time for the homecoming dance and also time to crown the 2022 homecoming king, Elijah Bishop. “My experience was rather nonchalant. It was fun, music was going, everyone was having a great time. The food was pretty good all around, quite a diverse section really. There were meatballs, varieties of chips with some buffalo dip, and quite a little section for deserts. Overall a great time just wish there were more slow dances instead of just one. It was a great experience provided by the school and I look forward to any new events like this one.”

QB1: Kaden Frederick talking to PES, getting them hyped for the big game!

Homecoming King and Queen, Elijah Bishop and Jamie Cowan!

## Chace Williams

The next student Greyhound Greatness award recipient is Chace Williams. Chace is an 8th grader. Chace participates in football and basketball. He has a great attitude, and works hard in class.

“He will go over and beyond for anyone. Super friendly, but quiet at times, but respects his peers and his student body, and enjoys being a greyhound to the fullest.” Congratulations to Chace Williams for receiving the Greyhound Greatness award!

## Tyquan Rice

The next faculty Greyhound Greatness award recipient is Tyquan Rice. Tyquan is the head coach for the high school football team.

“Does a great job in my independent studies by ensuring a safe and quiet place to do work. He also makes the environment fun by offering fun conversations, and gives great encouragement, and support for inside and outside of school.” Congratulations to Tyquan Rice for receiving the Greyhound Greatness award!

## Big District Win for the Greyhounds Over Undefeated Bracken County!

Brooklyn White

Paris Greyhounds going on a three-game winning streak. Friday night Paris battled and defeated Bracken county on homecoming night. Thanks to star players Elijah Webb (#13) and Darian Bell (#28), Elijah Webb was ranked most interceptions in the STATE last week! When asked about the homecoming game wide receiver Darian Bell said, “Had a lot to prove due to our loss from Pineville since bracken county was undefeated, the defense was doing their thing but the offense couldn't pull it through the first half, after scoring felt like we coming back together thanks to our linemen for the blocks”. Due to the linemen we asked Zian Webb (#75) how he kept his defensive linemen to stop Bracken county, “Knowing that their offensive linemen were good we just played hard but we were prepared for it, had to lock in and score” Due to Elijah Webbs game-winning interception we asked how he was prepared and what his mentality is for this game, “Listening to music keeps me locked in and focused for what I'm going against, knowing I had the interception it felt great because that was a real game changer knowing we were tied up with four minutes left and me getting that touchdown, it was game over.” Webb now also has the most interceptions in the state of Kentucky!

QB1, Kaden Frederick receives the snap

Jakari Ransom (5) and Jaiden Holman (3) tackle the ball carrier

## 8th Grade Night Win for Middle School Ladyhounds!

Last week was the last home game for the middle schools girl's basketball team as they go up against Frankfort on their eighth-grade night. When asked about their night the only two eighth graders Kyla Crutcher (#23) said “Going into the game knowing it's my last middle school game, I know that I had to play hard; listening to music keeps me focused and prepares myself for games and being one of the two leaders and starting point guard, communicating with my teammates and staying positive keeps the team going.” “It felt great going into my last eighth-grade game, I know I needed to play hard but was definitely prepared for it and ready to win. Due to my having multiple double-doubles this year I worked hard in practice, I was always working on rebounding and scoring around the perimeter and putting in the work! Me being one of the two eighth graders and having a lot of young players on the team it takes a lot of communication, positivity, and patience.”-Molly Mason(#2)

## UK Agriculture

Luke Emmons

Mr Norris' vet science class took a trip to visit the University of Kentucky. This group of kids went to the agriculture side of the campus.

They went on tours around the agriculture campus, one was going to the meat lab on campus where they saw some animals. They saw the inside of an agriculture class and went around the campus and saw many people. In addition to going to

the meat lab, we got to see different routes agriculture could take us, such as forestry, engineering tools to help farmers, and even a horticulture club that took a trip every year. They had gone to places such as Cuba, Ecuador, and

China. They had sign up sheets for you to sign up if students were interested in attending UK to major in it.

## An Eventful Day for the 'Academy of Health Sciences'

Jamie Youngs and Savannah Barrett

Students looking for a heartbeat in METI Man

All smiles before learning their blood type!

Paris High Schools dual credit courses aim to help their students better prepare for their future. Amy Majewski and her class recently had the opportunity to learn with the "METI Man". This technologically advanced mannequin mimics an actual patient by crying, seizing, and breathing like a human being. Opportunities like this offer greater education and experiences for students at Paris. "It gives us a jump-start in our pathway," Kendall Baldwin stated. "I feel like I'm a step ahead from others who don't get this same experience," Lily Lake continued. When Mrs. Majewski was asked how this technology influenced her students educational experience, she responded, "If they can use their skills on a mannequin, it would better prepare them for the real thing... It gives our students a leg up and keeps us competitive."

Additionally, one of her other classes had the opportunity to identify their own blood type. Representatives from MCTC came to help make this experience possible. Students watched a short, but thorough, presentation on basic safety protocol and how to identify the different blood types before mixing small amounts of their own blood in with different chemicals to observe the reactions.
